Buying a Laptop for College?

Windows vs Mac — The Complete Guide for Students

1. Match Your Laptop to Your Course

Different courses need different tools. Pick the one that matches your field so your laptop never slows you down.

Field / Course	Best Choice	Why?
Architecture / Civil Engg.	**Windows** ■	AutoCAD, Revit run best on Windows
Mechanical Engg.	**Windows** ■	SolidWorks, CATIA need Windows
Electrical / Electronics Engg.	**Windows** ■	MATLAB, Multisim, Proteus
Gaming / Game Design	**Windows** ■	Better GPU options, more game support
Coding / Computer Science	**Mac** ■	Unix terminal, stable dev environment
UI/UX Design	**Mac** ■	Retina display, Figma/Sketch work great
Video Editing / Animation	**Mac** ■	Final Cut Pro, smooth colour accuracy
Graphic Design	**Mac** ■	Best colour display and Adobe performance
MBA / Commerce / Arts	**Either** ■	MS Office, browsing — both work fine
Medical / Pharmacy	**Either** ■	Research tools work on both platforms

2. Battery Life — Will It Last the Whole Day?

Situation	Winner	Detail
All-day classes, no charger	**Mac** ■	MacBook lasts 14–18 hrs easily
Heavy gaming / rendering	**Windows** ■	Plugged in = better performance
Casual use + portability	**Mac** ■	Lightweight + long battery combo
Budget battery option	**Windows** ■	Mid-range Windows laptops do fine

3. Longevity & Resale Value

Factor	Windows	MacBook
Performance after 3 yrs	**May slow down**	**Still smooth** ■
Typical lifespan	3–4 years avg	5–6 years avg ■
Resale value	Drops quickly	Holds value well ■
OS updates support	Varies by brand	Long-term Apple support ■
Repair / service cost	Cheaper & widely available ■	Apple service can be costly
